

CompatiCard II software, Version 2.x

ADDED FEATURES:

The enclosed CCDRIVER software, version 2.x, supports added features not documented in your CompatiCard User's Guide.

CCFORMAT.COM -- A "CCFORMAT /360" option for 3.5" disks has been added.

FORMAT, DISKCOPY, DISKCOMP:

If you are currently running DOS version 3.2x or above, the DISKCOPY, DISKCOMP, AND FORMAT commands can now be used with CCDRIVER supported disk drives.

8 inch Disk Drives -- DOS does not include support for 8 inch disks, and therefore the FORMAT, DISKCOPY, and DISKCOMP commands are not supported on 8 inch drives.

INTERRUPT 13h FUNCTIONS:

Also supported in this release are a number of direct disk access functions available through BIOS Interrupt 13h. These are intended for the use of experienced programmers and are documented in the INT13.DOC file on the distribution disk.
